ARXSTRONG

A full suite of security solutions for businesses, houses of worship, schools, VIPs, private residences.

Our security experts use decades of real-world experience to design and implement safety solutions that will deter, impede and ultimately stop even the most determined or aggressive threats. Call us today for an analysis.

PREVENTION

Risk Assessment & Planning

We conduct a vulnerability assessment and then create a security plan to protect the people, property, and information important to you.

Threat Deterrence

We put in place deterrence solutions that are calibrated to prevent aggressors from targeting your property in the first place.

Detection & Monitoring

We install remote detection and monitoring tools tied to automated alert notification systems to ensure you know when a threat has emerged.

Access Controls

We put in place tools and physical barriers that strictly limit access only to those with proper identification or access authority.

PROTECTION

Hardening Solutions

We modify, enhance, or replace existing security measures to bolster your defenses and ensure you present a formidable obstacle to aggressors.

Hidden & Safe Rooms

We offer a complete spectrum of hidden and safe room solutions capable of protecting you, your property, and those who depend on you.

On-Site Inspections

We provide on-site inspections for unoccupied buildings and can serve as security contacts with police in your absence.

Ongoing Support Services

We provide 24/7/365 support services that ensure your security solutions remain one step ahead of new and emerging threats.

Protect what matters most.
